## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 22 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 8 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.
2. Claims 8, 12 and 13 are objected to because of the following informalities:
  - Claim 8 depends on a cancelled claim.
  - In claim 12, "incorporation" should be "incorporated".
  - Claim 13 depends on itself.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 4-7 recite the limitation "the polyamine product" in claim 1. There is insufficient antecedent basis for this limitation in the claim.
3. Claim 25 recites the limitation "the softening agent" in claim 24. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1743

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 9-13, 19-21 & 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6,730,635 to Wolf et al. (herein referred to as "Wolf") in view of USP 6,740,713 to Busch et al. (herein referred to as "Busch").

Wolf discloses a microcapsule that has a liquid insecticidal active ingredient encapsulated within a polyamine product sleeve (coating). See abstract. The active ingredient may be present in an amount of 0 to 20% by weight of the composition (see col. 6, lines 43-45).

Wolf differs from the instantly claimed invention in that it does not disclose that the active ingredient is a fragrance material.

Busch teaches a microcapsule product wherein the active ingredient may be a fragrance material or an insecticidal material. The active ingredient is in hydrophobic form. The final product may also include a silicone material, calcium chloride and a softening agent. The finished composition may be incorporated into a personal care product, cleaning composition or laundry composition. See col. 14, lines 30-67.

It would have been obvious to one having ordinary skill in the art to modify the Wolf reference by incorporating a fragrance material into the encapsulate in the place of the insecticidal as it been recognized in the prior art that encapsulates can deliver many types of active ingredients. Moreover, one of ordinary skill in the art would be motivated to utilize the particular microcapsule of Wolf with a fragrance active ingredient because the Wolf patent teaches the advantages of prolonged release and storage (col. 2, lines 38-44), both sought after properties in the fragrance art.

*Allowable Subject Matter*

6. Claims 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
